ESTELLES IN A SNAPSHOT

Details	
Introduction	• We are operating in USA, Canada since 2007 • Specializes in Hospitality, Multi-Family Accommodations, Commercial and Data Centers
CEO profile Shahab Kazmi	• Certified Lighting Specialist • 25+ years experience across Middle East and North America • Special strength in providing workable and efficient solutions for challenging projects
Our USP	• Specializes in efficient Product solutions with value added services to our Clients for their critical projects • Offering Best Value for Money, • With Best in Class Customer Services,
Highlights	• IHG certified Vendor – One of the only 2 in North America • Delivered 1,600+ successful Projects in 17 years across the World • 200+ satisfied Customer partners including global hospitality groups

What Sets Us Apart?

World-class Customer Service

- Focused Pre-sales and Post-sales Service
- High Customer Retention
- Collaborative Processes

Efficient and Win-win Pricing

- Most Competitive Pricing
- Consistent Value for your Money
- Lowest-possible Shipping & Customs Costs

Certification

- All Fixtures are Certified as per N. American Standards
- cUL & CSA Approved
- Wet & DarkSky Rated where Applicable

Building relationships, not customers

What Sets Us Apart?

Nation-wide Logistics Network

- Warehousing facilities in USA & Canada
- Deliver coast-to-coast across North America, Middle east
- Staggered delivery
- Logistical support across South Asia

Our Vision

We are a solutions-driven company specializing in sustainable, efficient and high-quality lighting portfolio and project-based design solutions for commercial and residential spaces.

We forge long standing relationships with manufacturers and suppliers in the fields of architectural and industrial lighting, custom hotel wood doors, solar energy solutions, custom lighting fixtures, LED lighting mirrors, hotel and apartment lighting systems.

We consistently enable our partners in delivering innovation, customization, and excellence in their hospitality and multi-residential development projects.

Hospitality – Curating the Ultimate Guest Experience

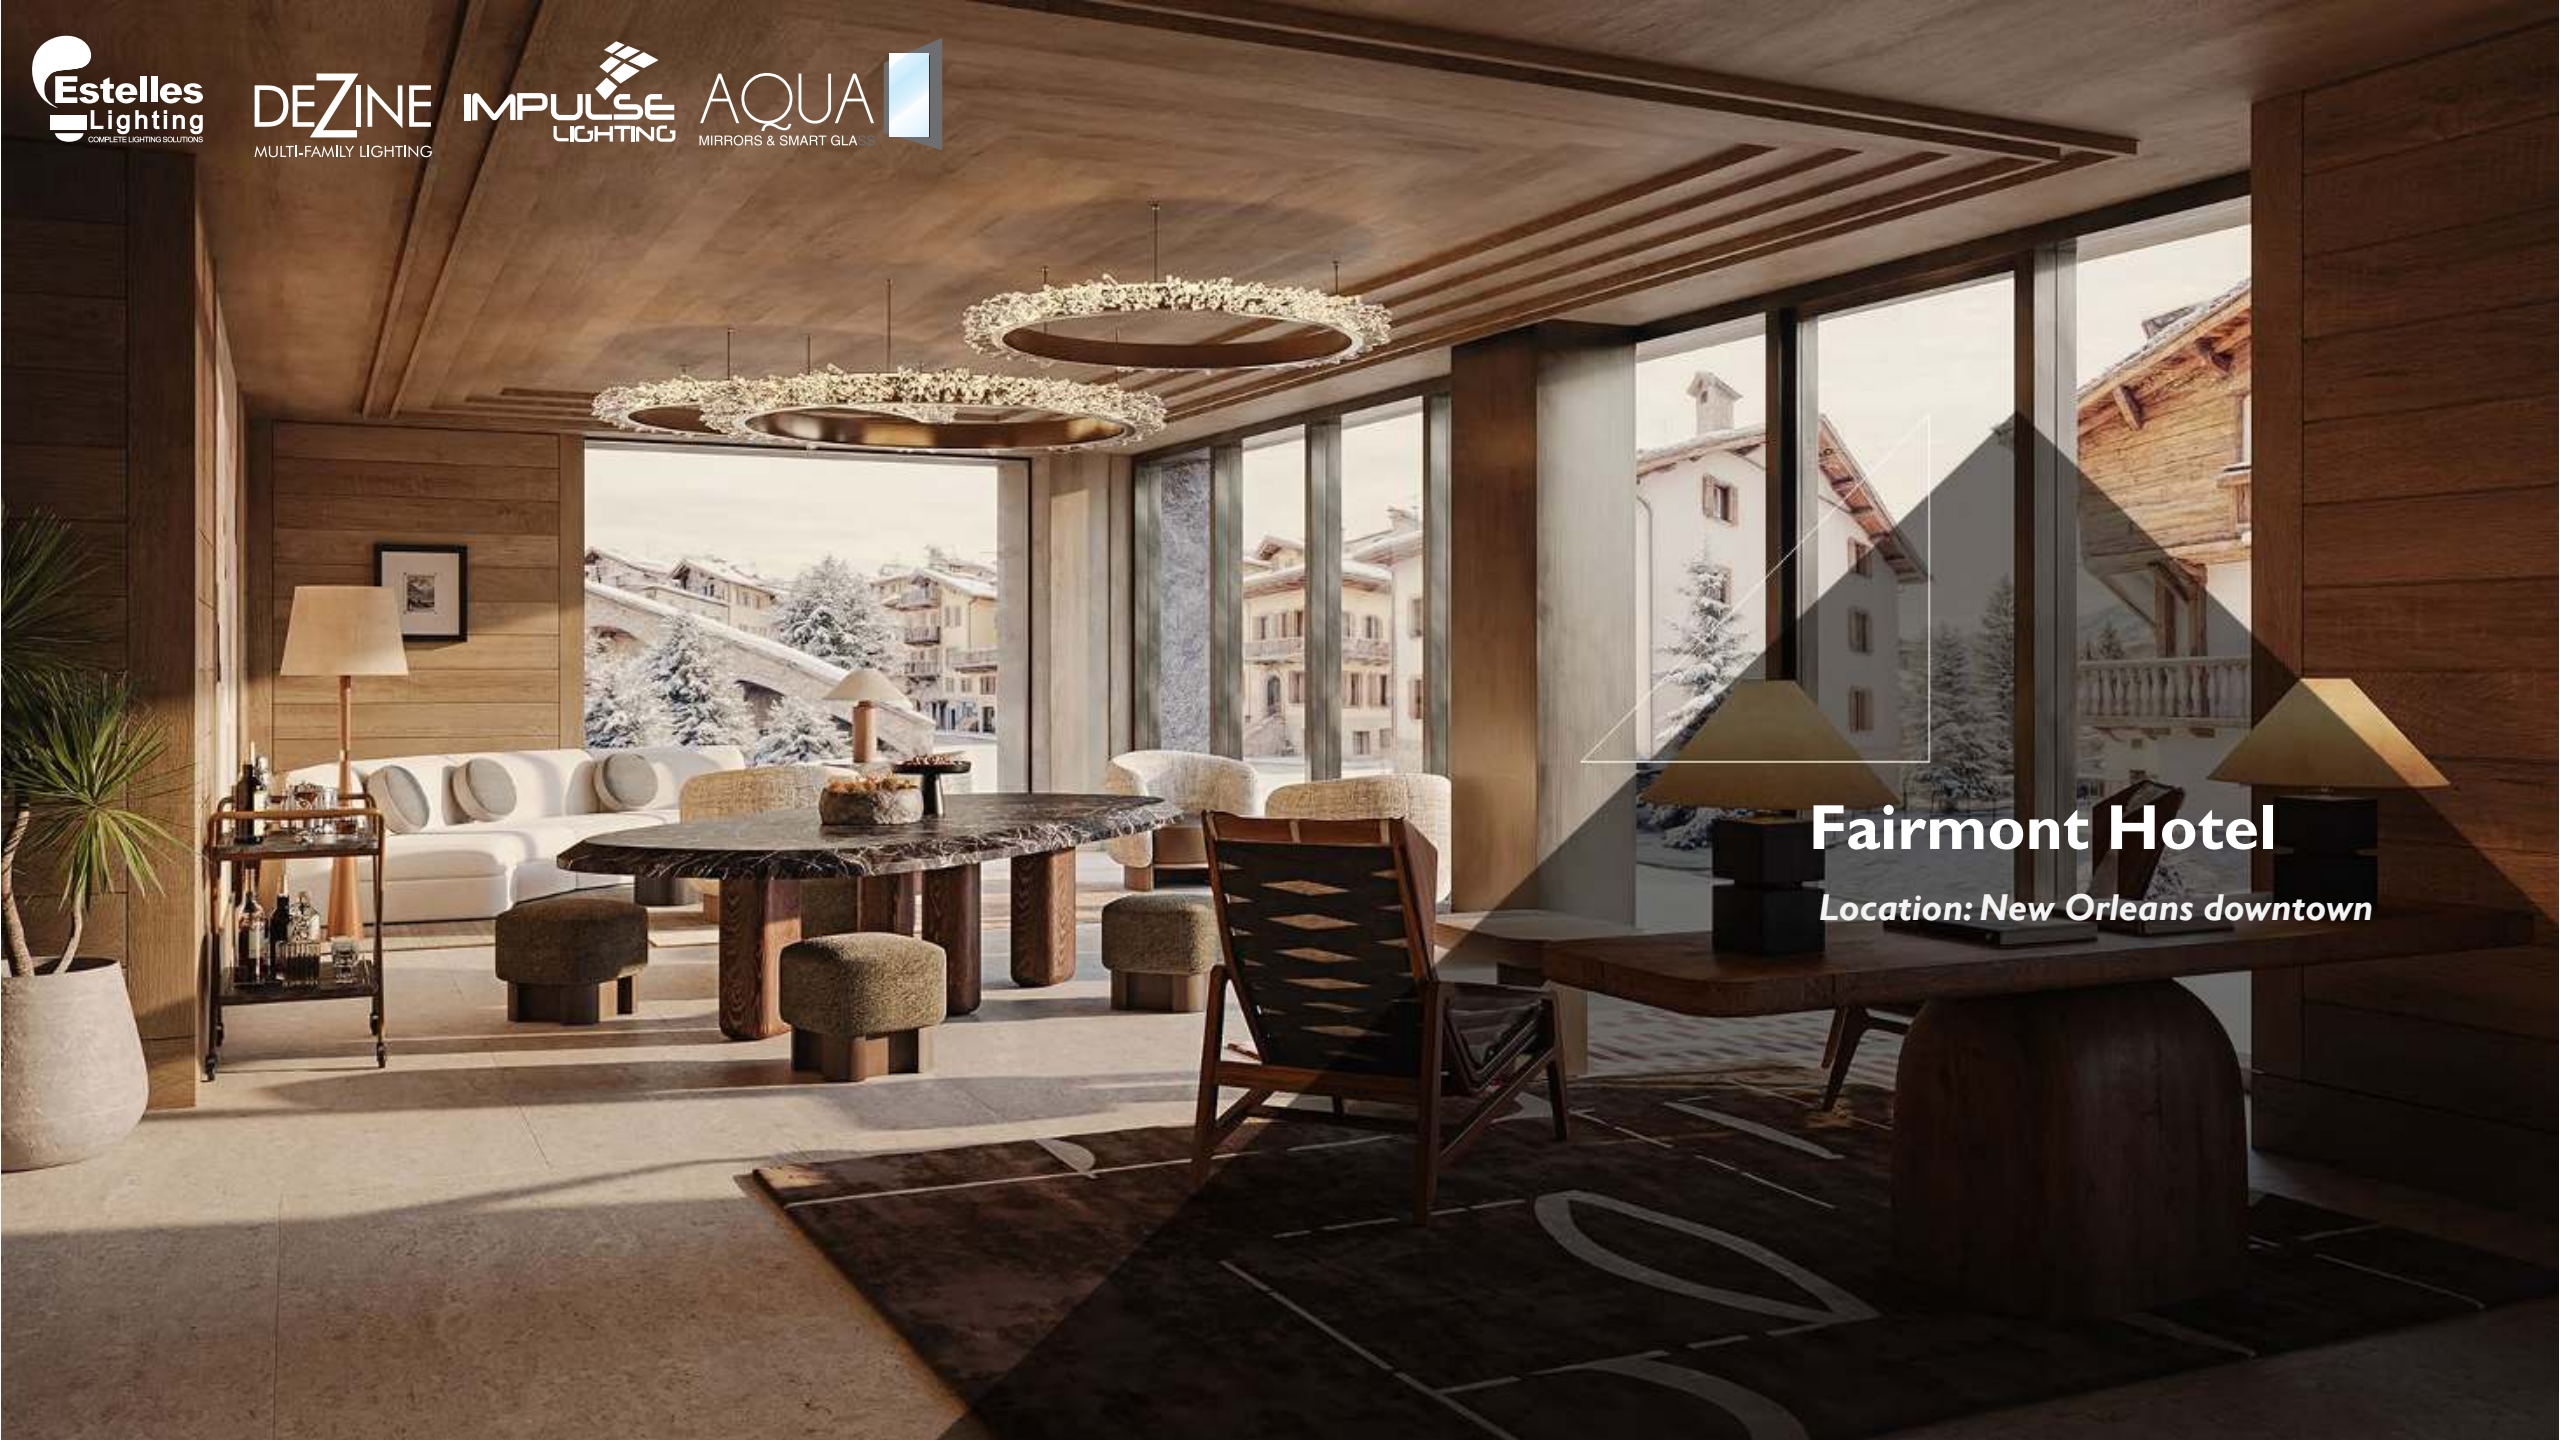

Every Design is a Story, told well.

Hospitality lighting plays a crucial role by creating inviting, comfortable, and visually appealing environments across hotels, restaurants, and resorts.

Our team at Estelles, complements our Designer and Consultant partners' thoughtful lighting designs and concepts, curating enhanced ambiance, with architectural features, and buttressing brand identity – all while balancing aesthetics with energy, efficiency and functionality.

From warm, welcoming lobbies to intimate dining spaces and relaxing guest rooms, effective lighting solutions at our esteemed global Hospitality partners sets the tone, influences mood, and leaves a lasting impression on visitors.

Letting them bask in the Story!

An aerial photograph of a resort pool area. The pool is a large, irregular shape with a light blue interior, surrounded by a sandy deck and lush tropical landscaping including many palm trees and other greenery. In the background, there's a body of water and a hillside with some buildings. A thatched-roof hut is visible on the right side of the pool.

IHG[®]

HOTELS & RESORTS

Estelles Lighting provided a full lighting solution for an IHG hotel, enhancing both guest comfort and energy efficiency. The project included custom indoor and outdoor LED fixtures tailored to meet brand standards while elevating the property's ambiance and functionality.

The result is a warm, welcoming environment that reflects IHG's commitment to quality and sustainability

LED INDUSTRIES

Introduction

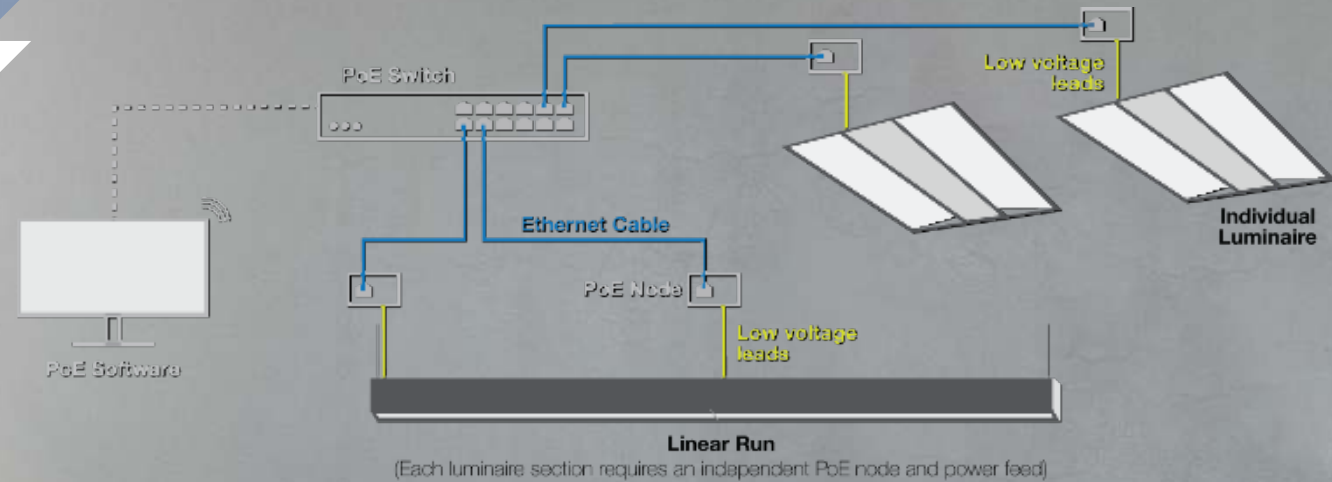

We specialize in advanced Power over Ethernet (PoE) lighting solutions designed for architectural, decorative, and commercial environments.

Since 2014, we've delivered successful smart building projects across the U.S. and internationally.

Our system combines robust hardware, intuitive software, and mobile apps to provide intelligent lighting control. As part of the LED Industries Group, we draw on extensive global R&D to offer reliable technology, expert project support, and comprehensive training.

Setup Method

- Software
- Switch
- Power supply
- Node
- Light

AC Input Power supply – provides power to the PoE Switch

PoE Switch: DC Conversion & divides the wattage to the nodes

Node: Enables communication & power distribution between all Devices on network though software

Software –User Friendly interface to configure and control devices on the network. I.e. On /Off , scheduling, Color tunability

PoE - Power over Ethernet

The future of sustainable, efficient
building infrastructure

Transforming premium properties
through intelligent power distribution.

Team Estelles

What is Power over Ethernet?

Single Cable Solution

PoE delivers both electrical power and data through standard Ethernet cables. This eliminates separate power supplies for networked devices.

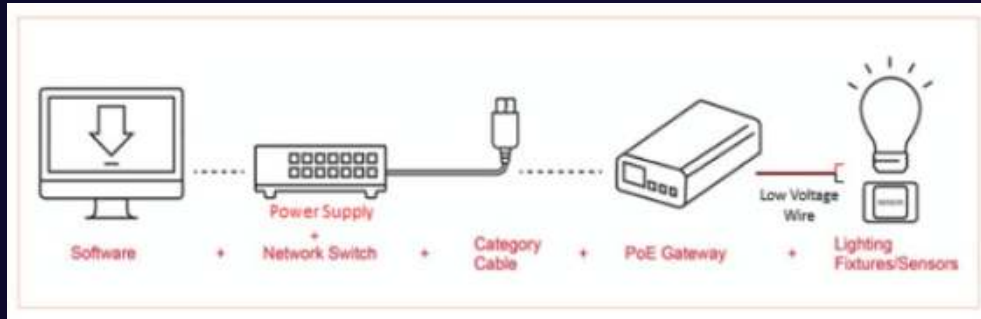

Simplified Infrastructure

Network switches or power injectors (PSE) send DC power to compatible devices (PD) through the same cable used for data.

Versatile Applications

Powers wireless access points, IP cameras, VoIP phones, and smart lighting systems throughout luxury developments.

PoE Component Workflow

AC Input Power Supply

Provides reliable power to the PoE Switch component.

PoE Switch

Converts AC to DC and divides wattage to network nodes.

Node

Enables communication between all devices through unified network.

Software Interface

Controls devices with scheduling, on/off, and tuning capabilities.

How Does PoE Work?

Power Injection

Electrical current enters the Ethernet cable via an injector component at the power supply end.

Signal Separation

Power current remains separate from data signals. Neither interferes with the other during transmission.

Device Compatibility

PoE-compatible devices function properly without modification.
Non-compatible devices require a "picker" to extract current.

Commercial Benefits of PoE

Significant Cost Savings

Reduces installation costs by eliminating separate electrical wiring and outlets. No licensed electrician required for deployment.

Unparalleled Flexibility

Devices can be placed wherever network cables reach. Ideal for premium spaces with specific aesthetic requirements.

Enhanced Safety & Reliability

Built-in protections against overload and incorrect installation. Low-voltage operation reduces electrical hazards.

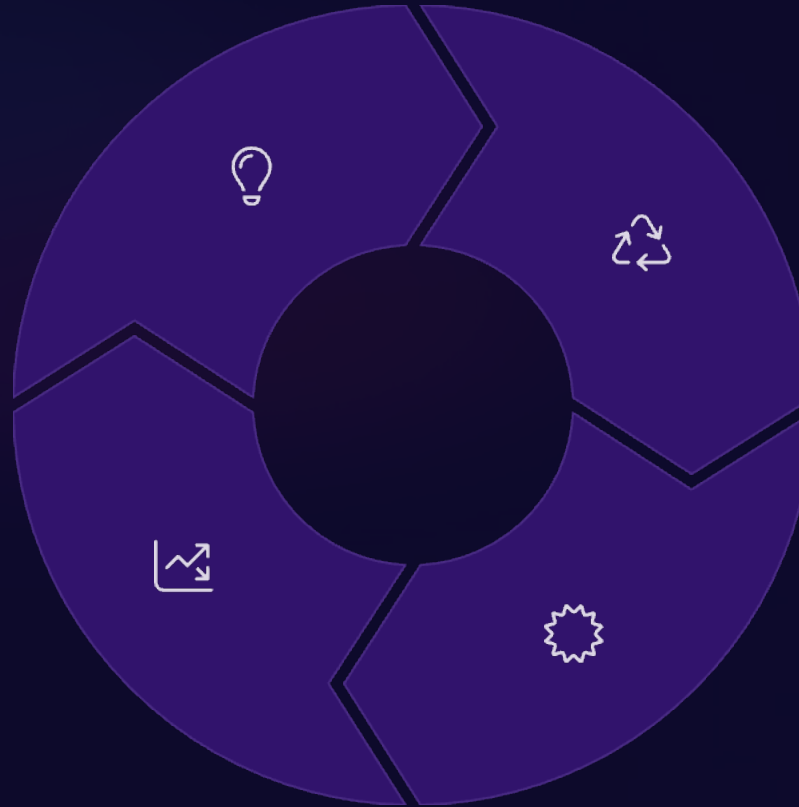

Sustainability Advantages of PoE

Energy Efficiency

Centralized high-efficiency power supplies (85-95%) reduce conversion losses compared to individual adapters.

Monitoring Capabilities

Provides detailed power consumption data for better energy reporting and ESG compliance.

Waste Reduction

Eliminates hundreds of individual power adapters that often fail and create electronic waste.

Building Certification

Contributes to LEED and BREEAM points through energy efficiency and innovative technology integration.

Evolution into Smart DC –

Traditional PoE

Limited power delivery through standard Ethernet infrastructure.

Enhanced PoE

Higher wattage capabilities with improved efficiency standards.

Smart DC

Intelligent power distribution with advanced monitoring and control.

Smart DC represents the next evolution in building power systems. It builds on PoE principles while offering higher capacity and more sophisticated management capabilities.

Meet Our Expert Team

Pls add facts

Matt

15+ years in electrical engineering with smart building specialization. Led Marina Bay Sands, Burj Khalifa, and The Shard projects. Oversees system architecture.

Yousuf Kazmi

10+ years in network infrastructure design. Delivered One World Trade Center, Hudson Yards, and Dubai Mall. Manages technical implementation.

Shahab Kazmi

12+ years in sustainable building systems. Completed The Edge Amsterdam, Gardens by the Bay, and Salesforce Tower. Leads client consultation.

Estelles PoE Expertise

20+

Major Real estate Projects

Successfully delivered across US and internationally since 2014.

100%

Custom Solutions

Tailored for architectural, decorative, and commercial lighting needs.

24/7

Technical Support

Comprehensive project assistance and training on control solutions.

Our solution integrates hardware controllers, programming software, and mobile applications. We leverage years of R&D in premium lighting control.

Case Study: Hotel Sinclair Boutique Marriott

Project Background

Prestigious 164-room historic renovation in downtown Fort Worth. Owner sought cutting-edge PoE technology for differentiation and adding Premium value.

Unique Challenges

Historic preservation requirements alongside modern technology integration. Complex retrofit in limited construction timeframe.

Estelles deliverables

Seamless integration of 1,500+ PoE lighting endpoints. Customized control system exceeding owner expectations. Delivered in 7 months*

Sinclair's Gains

30% energy savings. Enhanced guest experience with intuitive controls. Prestigious sustainability recognition.

<https://poelightingusa.com/projects/sinclair/>

PoE vs LVDC

Accommodates larger lighting loads
(more watts and mA)

Provides data and integration to 3rd
party systems

Uses Ethernet to power lights and based
on a global standard

Less expensive

Dims to Dark

User Defined Dimming Curves

Uses 100% low voltage direct current
power

PoE

LVDC

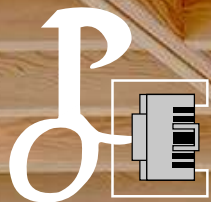

Our Major Projects

- We have been in the PoE market since 2014.
- First project was the 9500 sq.ft office space on the 6th floor of the Sanger building in Fort Worth, TX.
- 2017, Fort Worth, TX. CVS Pharmacy 15000 sq.ft.
- 2018, Fort Worth, TX. 16 story historical building converted to 165 room Sinclair Marriot Boutique Hotel by owner.
- 2019, Continental Gin historical building converted to tenant-leased space by owner. Dallas, TX.
- 2020, Round Rock School District, Campus Number 35, Austin TX.
- 2020, MIDAS shop, New Jersey
- 2020, Samsung Repair facility, Waco TX

Our Major Projects

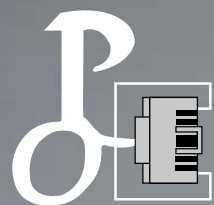

- 2021, Top Golf, New Jersey
- 2021, Cisco 1 Penn office, New York
- 2022, 8 story multi-family facility Austin, TX. Completed
- 2022, Uptown Assisted Living Space, Houston. Completed
- 2022, Southwire Office Space, Atlanta upgrading to POE. Completed
- 2022, Cisco Peachtree office, Atlanta. Completed
- 2023, Farm House, Auckland, NZ. Completed
- 2023, 165 room hotel in Lisbon, Portugal. Completed
- 2024, Resort in Utah, Completed
- We provide complete PoE lighting solutions.
- All our products are manufactured with meeting or surpassing the highest industry standard.

Introduction

Bloorz is a trusted one-stop solution for hotel renovations and construction across North America. Founded by industry experts with over a decade of experience, we offer a curated selection of hospitality-focused products, including vanities, sinks, shower doors, and more. With a commitment to quality, reliable delivery, and exceptional customer service, Bloorz builds lasting partnerships that help bring your hotel projects to life.

Pacific Series Shower Door

- **Dimensions:** 60"W x 76"H , 60"W x 78"H
- **Model:** LP-145 (Rectangular Hardware)
- **Description:** Framed Bypass Shower Glass Door
- **Glass Thickness:** 8mm (5/16") / 10mm (3/8")
- **Reversible:** Yes
- **Glass Details:** Tempered, SGCC Certified, meets ANSI Z97
- **Standard Glass Finish:** Clear (Custom available upon request)
- **Hardware Details:** Stainless Steel
- **Hardware Finishes:** Chrome Polish / Brushed Nickel / Brushed Gold / Matte Black

Atlantic Series Shower Door

- **Dimensions:** 60"W x 76"H , 60"W x 78"H
- **Model:** LP-140 (Circular Hardware) / LP-209 (Rectangular Hardware)
- **Description:** Frameless Single Sliding Shower Glass Door
- **Glass Thickness:** 8mm (5/16") / 10mm (3/8")
- **Reversible:** Yes
- **Glass Details:** Tempered, SGCC Certified, meets ANSI Z97
- **Standard Glass Finish:** Clear (Custom available upon request)
- **Hardware Details:** Stainless Steel
- **Hardware Finishes:** Chrome Polish / Brushed Nickel / Brushed Gold / Matte Black

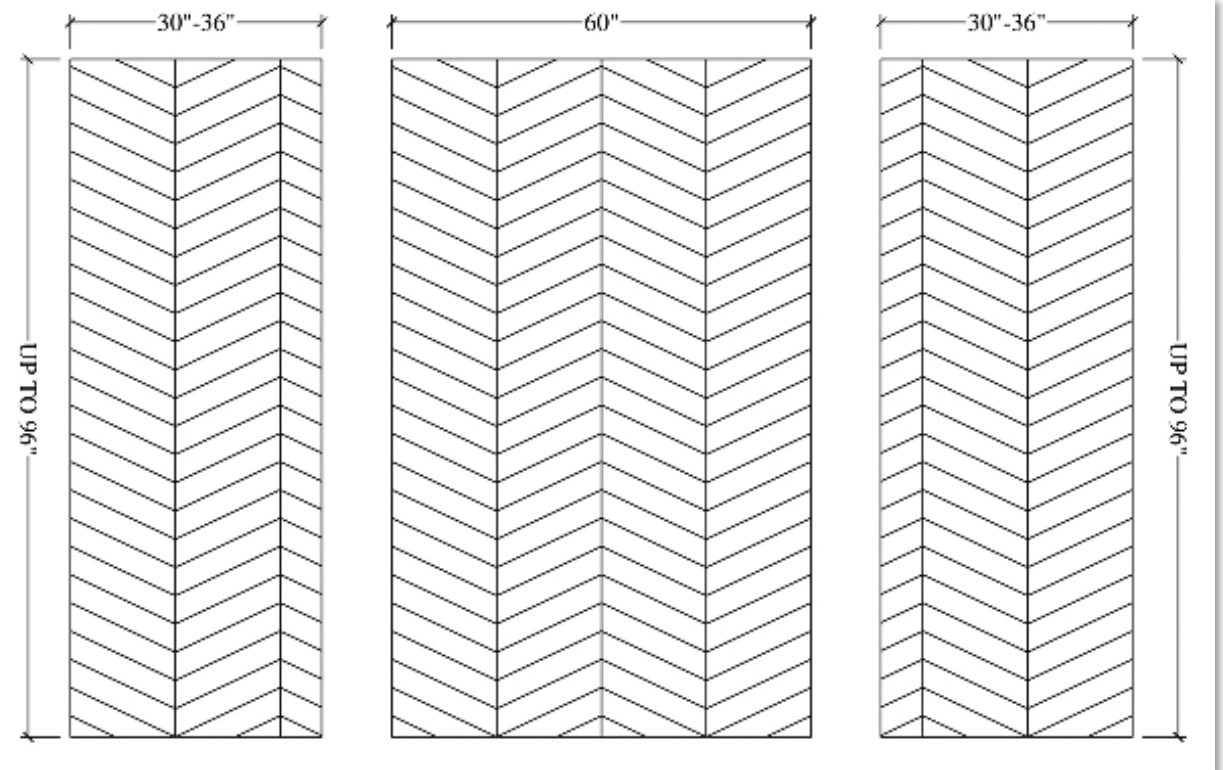

Cultured Marble Shower Base

- **Dimensions:** 60"L x 30"W, 60"L x 32"W, 60"L x 34"W, 60"L x 36"W, 72"L x 34"W, 72"L x 36"W
- **Model:** Crafted Series
- **Description:** Cultured Marble Shower Base – Matte White
- **Drain Location:** Left, Right, Center
- **Base Details:** cUPC, Anti-slip, Mold & Mildew Resistant
- **Drain Details:** WP-03 ABS Water Drain
- **Drain Cover:** Linear Stainless Steel 304 Drain Cover

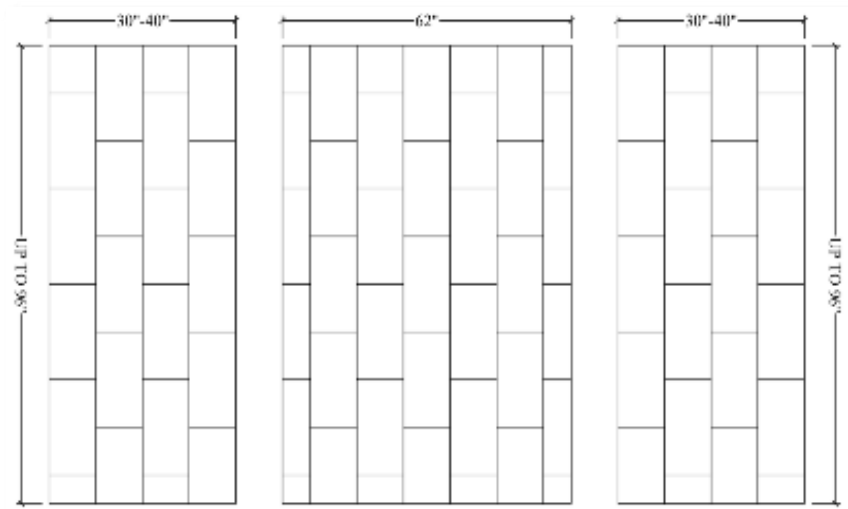

Wall Surrounds

- Set Dimensions (Shower): (2) 30"-36"W x 90"-94" H, (1) 60"W x 70"-78"H

Homewood - Pennsylvania (108 rooms)

Wall Coverings

- **Material Types:** Vinyl, fabric-backed vinyl, textile, paper, natural fibers
- **Vinyl Type:**
 - Type I (light duty)
 - Type II (medium/heavy duty) – Recommended for Hospitality & Commercial Projects
 - Type III (extra heavy duty)
- **Backing:** Fabric or paper-backed (fabric-backed is more durable)
- **Thickness:** Typically, 12–30 mils
- **Fire Rating:** Class A (ASTM E84 (US) or CAN/ULC S102(CAN))
 - Highest level of surface burning characteristics for building materials.
 - Low flame spread and a limited amount of smoke development.
- **Washability:** Washable or scrubbable (depending on finish)
- **Durability:** High – especially for Type II/III vinyl
- **Maintenance:** Wipe clean with mild detergent
- **Certifications:** Saber Certified, complies with SASO

Flooring - LVT

Luxury Vinyl Tile (LVT) is designed to replicate hard surface flooring materials such as stone or wood, yet provide many more practical benefits

- **Thickness:** 3–8 mm
- **Wear Layer:** 6–28 mils (12+ mils for commercial use)
- **Tough:** Waterproof, Fire-retardant, Scratch-resistant
- **Installation:** Glue-down, click-lock, or loose lay
- **Surface Finish:** Urethane or enhanced PU (scratch-resistant)
- **Durability:** 10–20 year lifespan
- **Appearance:** Mimics wood, stone, or tile (high-res print)
- **Maintenance:** Low – no waxing, just damp mop
- **Certifications:** FloorScore/GreenGuard certified

Offering high sound absorption and durability LVT is best suited for commercial & hospitality applications.

Flooring - SPC

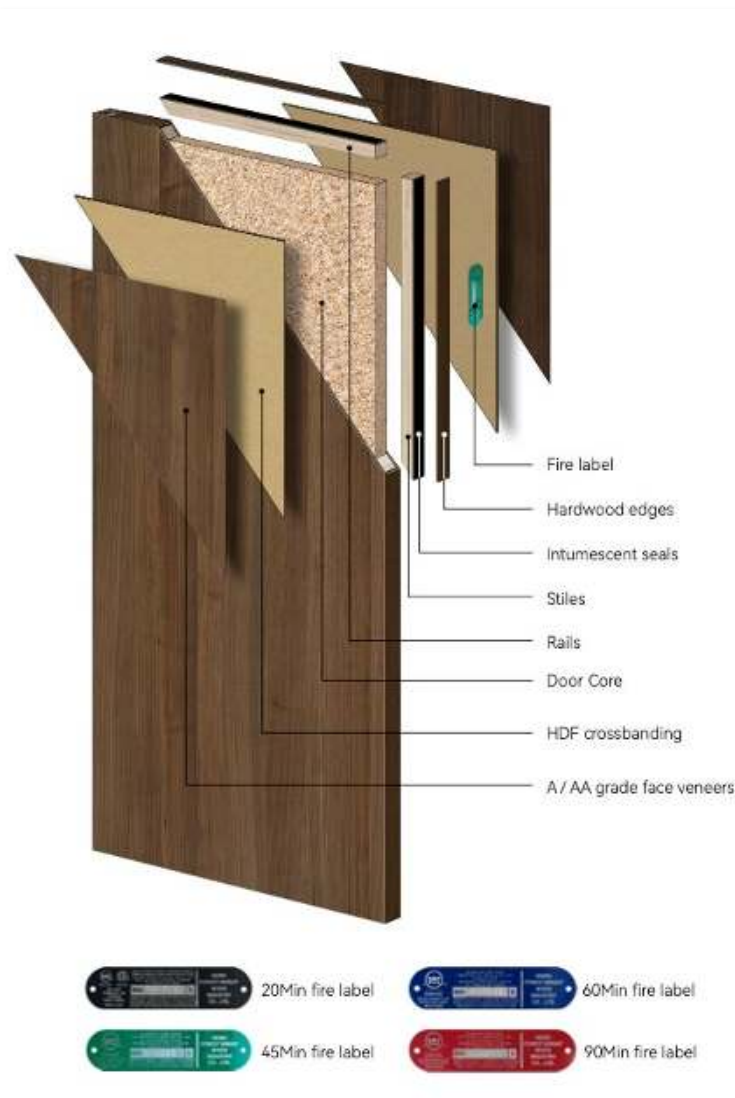

Stone Plastic Composite (SPC) flooring consists of a robust core layer made from a blend of natural limestone powder, polyvinyl chloride, and stabilizers. This unique composition gives SPC flooring its impressive durability and water resistance.

- **Thickness:** 4–8 mm
- **Wear Layer:** 12–30 mils
- **Tough:** Fire-retardant, Scratch-resistant
- **Core:** Rigid stone-plastic composite (limestone + PVC)
- **Waterproof:** Yes
- **Installation:** Click-lock (floating)
- **Underlayment:** Often pre-attached (IXPE/EVA)
- **Durability:** High – rigid, impact-resistant
- **Maintenance:** Low – sweep and damp mop

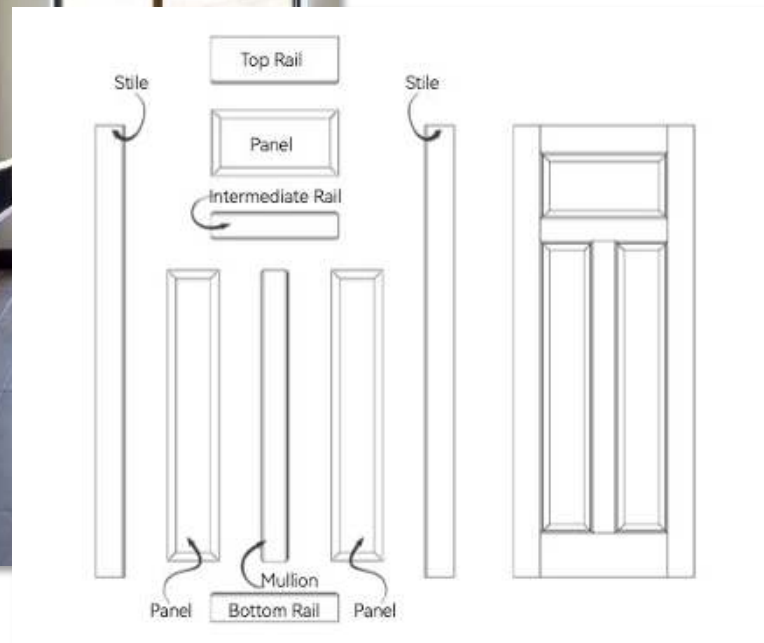

More cost-effective than LVT and better suited for residential applications.

Architectural Doors | Flush Wood Doors

- **Style:** Modern, versatile, and cost-effective.
- **Types:** Paint Grade, Stain Grade Veneer, HPDL.
- **Construction:** 3- to 5-ply with core options – particleboard, mineral, agrifiber, sound core.
- **Fire Ratings:** 20, 45, 60, 90 minutes (UL 10C, NFPA 252, UBC 7-2).
- **Acoustic Rating:** Up to STC 42.
- **Custom Options:** Carvings, metal inlays, sketch face veneers.
- **Sustainability:** FSC-certified materials, low-VOC finishes.
- UL & Saber Certified, complies with SASO

Architectural Doors | Stile & Rail Wood Doors

- **Style:** Traditional, detailed, and architecturally flexible.
- **Types:** Paint Grade MDF, Stain Grade Veneer.
- **Construction:** LVL core, real stile & rail joinery.
- **Custom Features:** Panel, sticking, glass insert options.
- **Fire Ratings:** 20, 45 minutes (UL 10C certified).
- **Acoustic Rating:** Up to STC 42.
- **Sustainability:** FSC-certified veneers, low-emission coatings.
- UL & Saber Certified, complies with SASO
